

SOLAR PV COMMERCIAL

Why SOLAR?

Choosing a solar PV solution is not only good for the environment - it is also great for business.

Attractive Return on Investment

Benefits to your business, school, factory or office:

- ✓ Reduce your current electricity costs and hedge against future energy cost rises
- ✓ Add value to your premises and increase your building's Building Energy Rating (BER)
- ✓ Avail of government incentives - be part of the SEAI EXEED program incentivising business to be energy efficient
- ✓ Avail of accelerated capital allowances (ACA) and tax incentives

Who is CubicM3?

CubicM3 is Ireland's leading commercial solar photovoltaic (PV) installer. We have completed projects with all major building contractors in Ireland.

Our experienced team members are highly skilled engineers and electricians. We are a registered electrical contractor and we keep installation 'in-house' to ensure the highest quality standards.

We recently merged with Warik Energy expanding our geographic reach and strengthening our team's expertise.

CubicM3 provides a full solar PV design, installation and commissioning service. With the latest software, experienced engineers and our own installers, our quality is first class.

Why choose us?

- ✓ Leading commercial installer in Ireland
- ✓ 10 years installing solar PV systems
- ✓ Thousands of installations across Ireland
- ✓ Safe Electric registered
- ✓ SEAI approved installer
- ✓ Exclusive LG Pro Installer Status
- ✓ Highest efficiency SEAI approved solar panels
- ✓ Over 15 years in business

Go Green - Save Money - Upgrade

CubicM3 Added Value Products and Services

- ✓ Energy monitoring available
- ✓ Web and phone app based solar monitoring tools

Businesses that operate after daylight hours can benefit from solar too. New battery storage options are evolving fast. At CubicM3 we have the latest technology to get your business solar ready.

By generating power from the sun, you will be reducing greenhouse gas emissions and achieving cost savings.

Optimise your roof space to gain a competitive advantage for your business.

Does your business depend on electrical power during the day?

Solar energy generation is at its highest when many companies experience peak energy demand. Commercial premises operating in daylight hours will benefit most from a solar PV system.

With a solar PV system designed for your building's orientation, your business will reduce its dependence on electricity from the grid and lower operating costs.

Commercial solar PV systems typically pay for themselves within 7 years. Investing in solar PV now will help insulate your business against future energy price rises.

Join the solar PV revolution today with CubicM3

Enquire today to find out how you can install solar, save money and go green.
